

CFS43 Side Event

Tuesday 18 October 2016

URBAN FOOD POLICIES AND THEIR ROLE IN SUSTAINABLE FOOD SYSTEMS

8.30 - 10.00 · Red Room (Building A), FAO
Light Refreshments will be served.

This side event aims to identify how national and international framing can support local level food policies, magnify their effects, and assure their longevity.

The session traces a variety of policy pathways, showcasing not only policies that have been initiated, but also *how* they were introduced and implemented. It discusses emerging forms of governance and urban-rural relations, and tools to identify policy levers for addressing food system issues in cities and their surrounding rural areas.

This side event is of particular relevance to the CFS43 Plenary Session IVe, **Forum on Urbanisation, Rural Transformation and Implications for Food Security and Nutrition.**

**Food and Agriculture
Organization of the
United Nations**

IUFN
international urban food network
